Projects

Sales Forecasting Project Github
(Completed) *Dec 2023- Feb 2024*

- This project focuses on sales forecasting using machine learning techniques. Leveraging datasets containing historical sales data, the project employs regression analysis to predict future sales trends.
- The project employs Python-based tools including pandas, numpy, seaborn, and scikit-learn for data analysis, visualization, and machine learning, facilitating accurate sales forecasting through regression analysis within the Jupyter Notebook environment.

Portfolio Website Github
(Completed) *June 2023 - January 2024*

- Developed a dynamic portfolio website emphasizing user-centric design and seamless navigation for an enhanced visitor experience.
- Implemented responsive design principles using HTML, CSS, and JavaScript to ensure optimal display across various devices and screen sizes.
- Incorporated SEO best practices to optimize website visibility and search engine rankings, increasing discoverability and reach.
